Report of School Board.

To the citizens of Gilmanton the following report is respectfully submitted :

The number of schools maintained for the year have been twelve, namely Kelley, Potter, Loon Pond, Smith Meeting House, Corner, Jones' Mills, Allen's Mills, Gale, Guinea Ridge, Lougetown, Lamprey and Iron Works.

Whole number teachers employed, seventeen. One male and sixteen female. Whole number of scholars attending school the past year was two hundred.

It is with considerable gratification, that your School Board is able to report the schools in town to be in a very prosperous condition. There has been considerable improvement in the percentage of attendance in nearly all schools during the past year. This means far more to the success, or failure of our schools than most people think. The average school life of most children does not exceed ten years. Hence if a child is allowed to be absent from school one or two days in a week during the school year, he must either do the work of ten years in six or eight, or else it will be forever lost to him. It should be a matter of conscience with parents and guardians to see that the children under their care and protection receive their just dues. A child who is defrauded of his educational rights is a hundred times more wronged than one from whom money is taken. In this age of the world and enlightenment, the uneducated man or woman must stay at the foot of the ladder. It behooves every parent to see to it, that their children are well equipped for life's battles with that potent weapon, education, lest the child in after years condemns them for defrauding *them* of their just dues. It matters not what pursuit in life a boy or girl may be called to fill, whether a tiller of the soil, a business man or woman or

whether he enters one of the professions, a good practical education is a solid rock to build upon. The best way to obtain this, is to improve every opportunity to attend school. Let there be unison between teacher and parent. The teacher is your child's best friend, therefore co-operate with her. The teacher should be a well educated person; capable of adapting herself to the needs of those placed under her care. She should also be able to teach, and thoroughly explain much subject matter not laid down in the text-book. The requirements of the child today are far more expansive than in former years.

REPAIRS.

During the past year the Loon Pond school building has been painted and kalsomined inside, and a hard wood floor laid at an expense of about \$55.00. The Gale school house has been equipped with the new Chandler seats in place of the old hard board desks. Which not only improves the looks of the school room, but adds materially to the comfort of the scholars. The expense of this was \$38.08.

We have one or two school buildings that will need shingling this coming spring, and they ought to be painted outside.

In conclusion we wish to express our appreciation of all courtesy shown us by teachers and parents during the past year.

Respectfully,

C. FRANK PAGE,	} School Board	
FRANK N. MERRILL,		of
LAURA E. VARNEY,		Gilmanton.

REPORT OF SCHOOL BOARD.

The school board of Gil'manton take pleasure in presenting to all interested its annual report.

The number of schools supported the past year has been twelve, the same as last year. Whole number of pupils attending not less than two weeks, 197 boys, 89 girls, 168.

Number of teachers employed during the year has been nineteen, one male and eighteen females. For further information in regard to schools, by whom, and where taught, studies pursued, attendance, etc., we refer you to the statistical table.

Aside from the literary money (about \$115,) our schools have been maintained by money raised by taxation. We were notified by the state superintendent that Gil'manton would not receive any part of the state appropriation for schooling in back towns, this year for there were rising sixty towns in the state in a worse condition regarding school privileges than is Gil'manton. We earnestly hope the above fact will not necessitate shortening the schools the coming year. Let us bear in mind that the money invested in educating our children will bring safer returns to them than a bank account. No man can take it from them. In this era of the world's history an education is not a luxury, it is a necessity to every child who is expected to make a success of life. An education such as our schools afforded fifty, or even twenty-five years ago, is not enough to meet the demands of today. More is required, more must be given. While we have not by any means attained the height to which we aspire yet the close of each year sees our work on a better basis. Since we have been able to maintain thirty weeks of school in a year instead of twenty weeks, the results have been doubly profitable and satisfactory.

Every year we are obliged to call the attention of parents

and guardians to lack of interest in regard to regular attendance. We make all reasonable allowance for sickness and conditions of weather, but these form a very small percentage of the absences that we are obliged to report to the state superintendent. A child is morally wronged if he is kept from school unless for one of the above-mentioned causes. A tardiness is still more inexcusable. Teach your child to be prompt. "Ignorance of the law excuses no one," is a trite saying, but right here we wish to insert the article relating to this subject, that all may know that children are required by law to attend school *every day* that school is in session, and also the penalty for non-compliance with the same. Chapter 93, section 14, as amended by chapter 61, session laws of 1903. Every person having the custody and control of a child between the ages of eight and fourteen years, or of a child under the age of sixteen years who cannot read at sight and write legibly simple sentences in the English language, residing in a school district in which a public school is annually taught shall cause such child to attend such school *all the time* such school is in session unless the child shall be excused by the school board of the district because his physical or mental condition is such as to prevent his attendance at school for the period required or because he was instructed in a private school, approved by the school board, for a number of weeks equal to that, in which, the public school was in session the common English branches, or having acquired these branches, in other more advanced studies. Any person who does not comply with the requirements of this section shall be fined ten dollars for the first offense and twenty dollars for every subsequent offense, for the use of the district. Under the existing law, a town constitutes a district.

Our schools as a whole have been wide awake and progressive. Some schools have been interrupted by sickness, but every child has had the chance for thirty weeks schooling.

Earnest, faithful work has been done by the majority of pupils and teachers. Mistakes have been made and will continue to be made till we reach the millenium. They are not

all made, however, by the school board and teachers. We must use double mirrors to see ourselves as others see us, then we shall be more charitable towards others and less so towards ourselves. No man's interest in the schools of his town should cease when his children leave them. In this work we must be broad minded enough to take in our neighbor.

Your repair money has been judiciously expended, and while several schoolhouses need painting outside, we have no school buildings in use that are not comfortable quarters in cold weather. New floors have been laid in the Jones' Mills and Allen's Mills schoolhouses, which were much needed. The Jones' Mills schoolhouse has also been shingled, and painted inside and new seats added. The Iron Works schoolhouse has been painted inside and one side of the roof shingled. New windows have been put in at the Loon Pond schoolhouse and the woodhouse shingled.

In closing, we wish to express our appreciation of all courtesy shown us during the past year.

REPORT OF SCHOOL BOARD.

To the citizens of the town of Gilmanton, the school board respectfully submit their annual report.

The numbers of schools maintained the past year has been twelve. Namely: Iron Works, Lougetown, Guinea Ridge, Gale, Kelley, Potter, Smith Meeting House, Pond, Corner, Jones' Mills, Sanborn and Allen's Mills. Number of different teachers employed during the year has been twenty-one. Whole number of scholars attending not less than two weeks, 188. In presenting our annual report of the condition of our schools, and the work done in them during the past year, we would say that while there has been much that is pleasing and satisfactory, and our schools have made good progress in most instances, yet the school board has met with many difficulties not very easily unravelled.

Our schools are constantly growing smaller from year to year and the one great problem is, how to so unite our schools and get the scholars together without incurring a greater expense than it costs to maintain a school. Many of our children are small, and if schools are united they must be carried, which fact only opens the door to the next step. By whom, and what will be the expense? It costs just as much to maintain a school of four or five scholars as it would a school of fifteen or twenty. Nor is this all. It is our experience that pupils will take more interest and do more and better work in a larger class. With our number of schools reduced, and consequently the membership increased. We could then afford to pay better wages, and at least command teachers with more experience. The best results can never be attained until we are able to

secure the services of educated, cultured, trained and devoted teachers in all of our schools.

When the common school was founded there was little or no knowledge of the science of education, the demand was quantity teaching, and in fact a great majority of the people are firm believers in quantity today. They insist that their children shall "go over," "go through," but particularly shall "finish." They seem to measure education by the yard. The time has come when we must have quality, or in other words scientific teaching. How can this best be obtained? Superintendent Morrison would say, try supervision. Hence an article has been put in the school warrant this year. "To see if the district will vote to place itself under supervision." Whether or not a movement in this direction will be of material benefit to our schools, is an open question. The expense, if united with two or three other towns will be about \$300 to each town. However, one thing is certain. Our schools can be very much improved by a hearty co-operation of all concerned.

Parents can do very much toward making a school a success, or on the other hand by listening to petty grievances brought home by "the only child?" talking the matter over, and too frequently agreeing with the child without any knowledge of the nature of the trouble can do much harm. Let the child's school life be imbued with the idea that schools are maintained for their good, and the rules laid down therein are to be respected and obeyed, and right and justice will prevail. See to it that your children are promptly and regularly in their places in the school room, allowing them to absent themselves on no pretext whatever excepting sickness, and our schools will be very much improved.

It is the aim of the school board at all times to employ the best teachers available for the wages paid.

The work of repairing school buildings has been hindered somewhat owing to the difficulty of getting help. It was found necessary to repair the Sanborn school house and

open a school in that district. The expense of repairs, including new seats was, \$68.40. We now have two or three buildings that need shingling and some that need painting.
